Innovation and technology have been my greatest inspirations since an early age. I aim to apply my knowledge and skills in a dynamic and innovative environment where I can collaborate with talented teams and continue to expand my horizons. My goal is to be part of significant projects, adding value and making a difference.

EDUCATION

University of Fortaleza (UNIFOR) — Bachelor's in Computer Science
2024 - 2027

ACADEMIC AND PROFESSIONAL EXPERIENCE

University of Fortaleza (UNIFOR) — Software Development Intern

Apr 2026 - Present

Acting in the Distance Learning (EAD) department, focusing on the development and optimization of digital educational systems. Designing and implementing process automation solutions to improve operational efficiency and workflow management. Collaborating with multidisciplinary teams to maintain and evolve web-based platforms, ensuring high performance and scalability.

PET-SAÚDE DIGITAL — Technology Scholar

Aug 2025 - Jul 2027 (Expected)

Participating in the Education through Work for Health Program, focusing on the digital transformation of the Unified Health System (SUS), integrating teaching, health services, and community to train students and professionals in the use of digital technologies. Working on the technology team, focusing on the development and application of innovative solutions.

Evolui — IT Instructor

Apr 2024 - Mar 2025

Provided support for the IT course, covering various areas, including the Office Suite (Word, Excel basic and advanced, PowerPoint), as well as other digital and productivity tools. My role was to teach the use of these tools and develop essential skills for the efficient use of various software and hardware, contributing to the students' technical and professional growth.

IV Extension Curricularization Meeting — Publication

Nov 2024

Experimentation of Prototypes: Experience Report on Building Electronic Games with Socio-emotional Themes for Elementary School Children. Presentation of scientific work and publication in the proceedings (ISSN: 1808-8457).

SKILLS

- Programming: Experience Java, JavaScript, Node.js, HTML & CSS.
 - Databases: Experience with MongoDB, MySQL, and PostgreSQL.
 - Languages: Advanced English (C2 EF SET Certificate).
-
